PROFILE

Digital Sciences Engineering Student at Toulouse INP-ENSEEIHT, I design and develop web applications from database architecture to user interfaces. Through two internships and several technical projects, I have acquired experience on both client-side (React, Node.js) and server-side (Flask, FastAPI, PostgreSQL) development. I am seeking a frontend or full-stack web development internship.

SKILLS

Web Development: React, Node.js, HTML, CSS, Tailwind CSS, Flask, Jinja2
Languages & APIs: JavaScript, TypeScript, Python, C, FastAPI
Tools & Data: Git, GitHub, Docker, PostgreSQL, Virtual Machines, Web Scraping
Artificial Intelligence: TensorFlow, PyTorch, LangChain, YOLOv8, FAISS, Google Gemini API
Soft Skills: Proactivity, organization, teamwork, communication
Languages: French (Native), English (B1 / Intermediate)

WORK EXPERIENCE

Web Development Engineering Intern **March – August 2026**
Valione Services, Yaoundé, Cameroon
- Developed a Microsoft 365 management and audit application: identity, device, Teams, SharePoint, OneDrive, Exchange, Intune, and Power Platform audit dashboards.
- Designed a real-time conversational interface (SSE streaming) with chat history search.

IT Intern **February – August 2025**
MINEPAT, DGEPIP, Yaoundé, Cameroon
- Built a web application (Python, Flask) for collecting and analyzing economic data on Cameroon.
- Implemented automated data collection via web scraping (BeautifulSoup) and integrated document analysis tools.

Digital Customer Service & Sales Representative **2023 – 2026**
Retail and Sales, Cameroon
- Handled customer relations, personalized consulting, and sales across online and retail channels.
- Utilized digital tools to support sales operations and customer conversion.

Mathematics and Computer Science Teacher **June – August 2023**
Intelligentsia Corporation, Yaoundé, Cameroon
- Taught mathematics to prepare students for entrance examinations to engineering schools.
- Taught computer science and general knowledge to final-year high school students.
- Adapted instructional materials and learning progression to fit each class level.

TECHNICAL & ACADEMIC PROJECTS

- **CacaoDetect**: Cocoa plant disease detection using computer vision (YOLOv8, FastAPI, React, PostgreSQL).
- **Recommendation System**: Movie recommendation pipeline on MovieLens (LightGCN) with a Flask inference API.
- **Visual Search Engine**: Image similarity search engine (ResNet50, FAISS, PCA).
- **Collective Vision Assistant**: Pedestrian crossing and traffic light detection system for visually impaired individuals (YOLOv8n).

EDUCATION

Master of Engineering in Computer Science & Digital Sciences **2026 – 2028**
Toulouse INP-ENSEEIHT, Toulouse, France, Dual Degree

Engineering Degree, Specialization in Artificial Intelligence **2022 – 2026**
National Advanced School of Engineering of Yaoundé (ENSPY), Cameroon, Competitive Entry

High School Diploma (Baccalauréat C), Mathematics & Physics **2022**
Lycée Général Leclerc, Yaoundé, Cameroon

HONORS & AWARDS

- Ranked Top Student in 1st, 2nd, and 3rd academic years at ENSPY.
- Presidential Award for Academic Excellence, 2024 and 2025.

CERTIFICATIONS

Understanding Artificial Intelligence, DataCamp **2025**
Intermediate Python, DataCamp **2025**
Generative AI, Coursera **2024**
Responsive Web Design, freeCodeCamp **2023**
